📁 PROJECTS

Employee Management System 🔗
Built a scalable full-stack Employee Management System using the MERN stack with secure JWT & Google OAuth login, role-based access control, dynamic dashboards, and admin-controlled CRUD operations for users and salaries.

Code Reviewer AI 🔗
Created a full-stack AI-powered code review web application using React, Node.js, and Gemini Flash 2.0 API that provides real-time, context-aware feedback for JavaScript and Python code. Integrated AI prompt engineering, client-server communication, and dynamic input handling to simulate an interactive code mentor experience.

SkillForge – Interactive Portfolio Builder 🔗
Developed a dynamic portfolio builder using HTML, CSS, and vanilla JavaScript with modular, component-like UI generation. Implemented custom forms, event handling, and DOM-based interactivity without any frontend frameworks.
